PROVIDING QUALITY COURT INSTALLATIONS SINCE 1978

Tomko Sports Systems is a recognised leader in the installation of all types of sports surfaces. We represent leading products for most sports and recreation applications.

PLEXIPAVE® SYSTEM

Since 1952 Plexipave Sport Surfacing Systems have been the world's leading supplier of acrylic tennis court surfaces.

Plexipave is a technologically advanced surfacing system used when only the best will do. Formulated to accommodate all levels of play, the consistency of the Plexipave surface is apparent from novice to professional.

The Durability of Plexipave is second to none. Ultraviolet degradation, severe weather and harsh climate are no match for this all-weather surface. Applied on asphalt or concrete, the Plexipave system is a 100% acrylic surface, which will maintain color, ball bounce and a consistent speed of play for years of long lasting service.

Playability is an important factor in the construction of any court. Facility managers, coaches and players agree, it has become more important to play on surfaces that fit all playing styles and provide accurate and predictable ball bounce. Each Plexipave system has been rated by the International Tennis Federation (ITF) and is accepted for all levels of international competition. Plexipave is available in 10 standard colors.

The Value of Plexipave is determined by its durability and playability. Court installations range from a tournament or resort complex to a small municipal park or residential installation; there are several Plexipave systems available to meet the needs and budget of each facility. The long lasting service and value that is maintained throughout the life of the surface reflects the affordability of a Plexipave court.

Continued Development of the Plexipave system is vital to its continued success as the world’s most demanded acrylic tennis surface. Whether it is testing the latest surfacing technology or the final inspection of a finished court, the outcome is a surfacing system that consistently outperforms the competition.

FULL COLOR MANUFACTURERS BROCHURES ARE AVAILABLE UPON REQUEST
PROVIDING QUALITY COURT INSTALLATIONS SINCE 1978

PLEXICUSHION® SYSTEM

The Plexicushion System combines the consistent bounce, sure footing, and outstanding durability of Plexipave with the innovative shock-absorbing properties of EPDM Rubber cushioning. The result is a surface that dynamically responds to body impact and reduces fatigue on players' legs, knees, ankles, & feet.

• Increases health & longevity for players of all ages.
• Adjustable level of cushioning.
• Can be customized to all ITF Pace Ratings.

The Plexicushion substrate, a special blend of latex, rubber, and plastic particles, forms a resilient layer that absorbs body shock and reduces muscle fatigue. The 100% acrylic Plexipave surface provides consistent and uniform bounce, long-lasting color, and allows speed of play specification.

PREMIER COURT®

PREMIER COURT was designed to solve two major problems plaguing the tennis industry today:

1) The need for a cost effective, maintenance free, crack proof tennis surface; and

2) The need for a cushioned surface that plays consistently & provides real relief to aches & pains.

PREMIER COURT is a system of 6’ by 60’ mats that are a laminate of synthetic fabrics and an open-celled, polyurethane foam, permanently bonded at production. These mats are seamed together at the job site and coated with the plexipave acrylic surface system. This combination makes PREMIER COURT a "soft court" that plays like a "hard court". The open-celled, polyurethane foam actually absorbs the pounding created as you run from shot to shot. This greatly reduces the down-force impacts that will radiate pain through your back, knees, hips and ankles.

SPORT COURT®

Sport Court is a suspended modular tile tennis court surface. It is an excellent multi-purpose surface featuring high durability and low maintenance. The suspended design has lateral forgiveness and is easier on knees, ankles, shins, and backs.

Dynamic Force Transfer System

Patented Lateral Forgiveness™ reduces stress to knees & joints

Vertical Suspension feature provides protection and energy return for competitive play

Traction for quick stop and go action

FULL COLOR MANUFACTURERS BROCHURES ARE AVAILABLE UPON REQUEST
SYNTHETIC GRASS COURTS . . . COOL & COMFORTABLE TO PLAY ON . . .

Synthetic Grass products are ideally suited for new installations or existing courts. Tomko’s experience in sub-base design brings added cost savings for initial construction. For existing concrete and asphalt courts; even badly cracked courts, Tennis Turf can be installed with a minimum of surface repair and preparation.

The surface consists of specially graded sand filtered into a grass-like carpet of durable, tufted polypropylene fibers. Court lines are inlaid into the surface and are made of the same material as the remainder of the court surface. The entire surface is “Loose Laid” and will not crack, peel, bubble, or spall.

Tomko Sports offers four versions to match your budget and performance characteristics.

CLASSIC CLAY . . . SLIDING SURFACE . . . NO WATERING

Classic Clay courts replicate the slide characteristics and feel of clay courts while avoiding the maintenance and mess associated with natural clay. Natural Appearance and Playability of French Clay.

HAR-TRU COURTS

The Har-Tru court has evolved since 1968 into a modern, easy to maintain, practical court system. The introduction of HydroCourt and the development of sub-surface irrigation has reduced water usage, maintenance, downtime, and has totally changed the perception of clay courts. The look of European clay courts with significantly less maintenance is available with American Red Clay Blend.

- Reduced Injuries
- Longer Rallies
- Long Lasting Court
- Longer Playing Life
- Rapid Drying Times

FULL COLOR MANUFACTURERS BROCHURES ARE AVAILABLE UPON REQUEST
PLEXIFLOR MULTISPORT SYSTEM

• A reinforced, smooth yet textured, acrylic coating formulated for inline hockey, basketball, and multi sport areas.
• Exceptionally tough surface designed to withstand the intense activity of basketball or inline hockey.
• Allows inline hockey pucks to glide without chatter.

MULTI-PURPOSE COURTS

People of all ages can enjoy numerous activities on your multi-purpose recreation court. Size required varies from 25’ x 30’ to 40’ x 80’ depending on primary uses. Please see our equipment sections and price list for all your multi-purpose court equipment needs.

• Basketball • Volleyball • Badminton • Pickle Ball • Paddle Tennis
• Shuffleboard • Fitness Activities & Games

ACRYLOTEX DECORATIVE PAVEMENT COATING

• Decorative pavement coating for application over concrete & asphalt.
• Textured, slip resistant surface colors for pathways, patios and driveways to match the design elements of virtually any project.
• Unique chemical composition allows for application over concrete without acid washing & prime coats.
• Greater durability and texture than tennis court systems.

SURFACING MATERIALS & EQUIPMENT

Tomko Sports offers quality Surfacing Materials packaged for maintenance staff or the Do-It-Yourself Installer.

• Court Patch Binder Patching Slurry
• Paste Crack Filler
• Pourable Crack Filler
• Acrylic Resurfacer
• Fortified Plexipave
• Colored Line Paints
• Court Surfacing Tools & Equipment

TENNIS NETS

TN90HT TENNIS NET

Tomko’s TN-TN90HT Tennis Net is one of the finest tennis nets made. It is hand crafted to our exacting standards. TN-TN90HT ...... 22 lbs

Net Body: 3.5 mm high density, 1 3/4” square mesh braided polyethylene. Top 6 rows of mesh are individually tied double mesh.

Braided net body is far superior to a twisted mesh material!

Side & Bottom Tapes: 6 mm black UV treated vinyl. 2 1/4” wide side. 1 3/4” wide bottom. 1/2” fiberglass dowels included.

Net Cable: 4.0 mm galvanized steel cable with 2.0 mm white vinyl coating. Minimum break strength 2300 lbs.

Headband: Heavy Duty vinyl coated polyester 2 ply - 14 oz inner layer and 18 oz outer layer. Sewn with 4 rows of lock-stitch, UV stabilized white polyester thread. Far superior construction in the area often struck by tennis balls!

Tapered Net Design: Official 42” high at net post and 36” high at center. Net does not drag at center court leading to increased net life. When a center strap is used there are no “wrinkles” common with standard nets.

TN-TN90HT ..... 22 lbs

3 Year Limited Warranty

A Quality net for most applications.

Net Body: 3.5 mm high density, 1 3/4” square mesh braided polyethylene. Braided net body is far superior to a twisted mesh material!

TN-NRTS ........................................ 6 - 8’ 6” Pieces

TN-NRTL ........ 410’ spool .......... 1 lb

TN-NRN ............. Net Repair Needle

TN-QKSET .... Quick Set Center Strap

Reinforced vinyl with velcro fastening. Comes premarked for 36” net setting.
TENNIS POSTS
Premier & DTP Tennis Posts Are Top Of The Line

These durable steel posts feature an internal winding mechanism that is self-locking to prevent recoil during winding. The gear ratio is 30 to 1 to ensure easy operation. The steel gears are plated for rust resistance and the worm gear is case-hardened to prevent jamming. The chrome plated handle is easily removed which, with the mechanism’s internal design, leaves little on the outside to snag clothing or cause injury.

The caps and gear housings are of cast aluminum alloy for maximum exterior use.

DTP37 Tennis Posts feature the same mechanism mounted outside the post, but encased for safety and a neat appearance. The chrome plated handle is also removable. All our steel posts come in your choice of black or forest green powdercoat polyester finish which is fade and chip proof.

PREMIER ROUND
3" OD round 11-gauge steel with chrome plated gear plate. Complete with welded lacing rods for securing the net to the post.

46 lbs

White numbers on dark green background. Durable ABS Plastic 8” wide x 10” high. Please specify numbers when ordering.

**TA-CNB** .......... 1 through 20 available
COURT BENCHES & WATER REMOVERS

DENT-SAVER BENCH

Painted green or clear stained wood.
TA-DSW .......... 5’ x 17”W ..........60 lbs
Recycled HDPE plastic; 4’, 5’, & 6’ long by 18 1/2” wide. Forest Green, Gray and Cedar colors.
TA-DSRP_ 4’ - 60 lbs .... 5’ - 69 lbs .... 6’ - 82 lbs

MAJESTIC UMPIRE CHAIR

TA-MUC ................................. 95 lbs

COURTSIDER BENCH

The “Courtsider” bench is 5’ long and constructed from maintenance free, high density polyethylene. Bench is easily assembled and can be bolted into place. Available in White or Green.
TA-BS5_ ............................... 35 lbs

MALL STYLE BENCH

This 5’ bench has a high quality 14” wide slatted platform with natural varnish finish. Conveniently fits between tennis posts with ample room for players to pass by. Extremely durable yet highly attractive.
TA-MSBW .............................. 44 lbs
Same as above except bench is made of recycled plastic (White- Grey - Oak).
TA-MSBR_ ............................. 48 lbs

AQUA-DRI

The 36” wide Aqua-Dri has a unique “rolling seal” action that continually squeegees water ahead of the roller. Surface need not be perfectly flat as roller will adapt to the contours of the surface. Powder Coated Aluminum handle, improved plastic T-bracket, and steel powder-coated roller frame.
TA-AQDRS ...... Seamless Unit ...... 7 lbs
TA-AQDRP ...... Blue PVA Unit ...... 8 lbs

DRY COURT

Removes large quantities of standing water from your tennis court to help your court dry faster. Five foot “winged” squeegee and dual rollers makes easy work of pushing water off your court without damaging or scraping the surface. Can also be devised to collect tennis balls.
TA-DC ................................. 11 lbs
TA-DCB Replacement Sponge Rubber Blade

WATER BROOM

This heavy gauge steel & brass Water Broom is designed to clean surfaces fast. Connects to ordinary garden hose. Six miniature nozzles form a spray cleaning pattern approx. 34” in width. Water Broom rolls easily on double ball bearing castors. Includes heavy duty cast brass hose fitting and opening valve. Good water pressure is required.
TA-WBR ................................. 9 lbs

ROLLER OPTIONS

- 4” thick seamless soft polyurethane foam is our standard.
TA-AQDRSR Replacement Roller ... 2 lbs
- Blue poly-vinyl alcohol (PVA) foam dries hard & softens when wet. Longer life when maintained properly.
TA-AQDRPR Replacement Roller . 3 lbs

All Water Removers can be used at Pools, Golf Greens, & other Hard Surfaces. Great for taking the Water off Ice Arenas at end of season.

ROLLER REFUGE

Great for hanging & protecting your Aqua-Dri from the elements. (Not Shown)
TA-RREF ............................... 6 lbs
A must for indoor tennis courts. One man with the Kleen Sweep 27 can clean an area of 31,000 sq ft in one hours time. The sweeper travels easily over any surface and picks up ball fuzz to fine dirt. A rotary side brush sweeps out from the walls and corners to the main brush. 27” wide.

**TA-KS27 ******** 57 lbs**

The Kleen Sweep 35 is a high efficiency sweeper utilizing a rechargeable battery system. Has a 35” sweeping path with variable sweeping speed.

**TA-KS35 ******* 367 lbs**

**LINE TAPES**

- 490’ per roll.
- Even textured surface provides consistent ball bounce.
- Long lasting vinyl-coated synthetic webbing.
- Available in punched holes only - 30 lbs ea.
- **TA-15CP** Classic
- **TA-15DP** Designer
- **TA-15HBP** Herringbone

**TA-062A............................. 8 lbs per court**

**TA-063A............................. 11 lbs per court**

**SCARIFER/LUTE**

- Scarify, level, smooth, top dress & clean.
- Straight edge lute on one side, flip for serrated scarifer on second side.
- 30” wide.

**TA-1430 .......................... 5 lbs**

**DRAG BRUSH**

- 7 Foot, Aluminum construction with wooden handle.
- 3 rows of 4 1/2” never shed bristles.
- Includes handy fence hooks for storage.

**TA-117H .......................... 22 lbs**
These are the original battery-powered machines that can be taken to any court without worrying about an electrical outlet. Patented technology combined with over 17 years experience and refinement have made these machines #1 worldwide. One Year Parts & Service Depot Warranty.

All machines have these standard features:

- Rotating throwing-wheel operation.
- Superior maintenance-free polyurethane throwing wheels.
- Fold-up ball hopper that holds 150 balls.
- Electronic control panel for all functions.
- Exclusive anti-jam ball feed mechanism.
- 10 second start-up time delay.
- Built-in H.D. lead-acid sealed battery with 4 - 6 hrs typical playing time; 12 - 18 hrs typical full battery recharge time.
- 10 - 85 mph ball speed. • 1 1/2 - 12 second shot interval.
- Built-in random horizontal oscillator.
- Adjustable ball trajectory - groundstrokes to lobs.

**TENNIS TOWER AC POWERED BALL MACHINES**

*Tennis Tower has all the world class features of Tennis Tutor but is designed for club or private court use. It features four oversized caster wheels & a built-in handle for rolling on and off the court. Large 250 ball capacity. One Year Parts & Service Depot Warranty ....... 60 lbs*

Four Models to Choose From:

- **TB-COMPC • Competitor Classic**
  - all standard features (no spin).

- **TB-COMP • Competitor**
  - all standard features with spin.

- **TB-CLUB • Club**
  - all standard features with spin & remote control.

- **TB-PRO • Professional**
  - all standard features with spin, remote control & additional Dual-2-line oscillator.

---

**SHOTMAKER AC POWERED PROFESSIONAL MACHINES**

*The Shotmaker is a top-of-the-line professional ball machine. Its power and versatility will challenge players at any level, including professionals. The case is made of high impact injection-molded plastic and powder-coated aluminum for strength and rust resistance. The electric motors are all H.D. commercial grade and maintenance free. Two Year Parts & Service Depot Warranty ...... 96 lbs*

All models have these features:

- Large 300 ball capacity. • 10 - 95 mph ball speed.
- 1 - 6 second shot interval.
- Adjustable spin from heavy underspin, flat, to heavy topspin.
- Random & programmable oscillator functions.
- Clear high-impact plastic control panel cover.

- **TB-SHSD - Standard Model** can be programmed to shoot the ball to any or all of three set positions. An optional remote control is available.

- **TB-SHDL - Deluxe Model** can be programmed to shoot balls in a pattern of up to six shots with each shot directed to any of five different court positions. It includes a two-function remote control.

- **TB-SHSD2 - Super Deluxe Model** uses a “Touch Overlay Panel” to provide shots to any of 7 different court positions. “Quick Set-up” provides 3 preprogrammed sequences (beginner, intermediate, advanced). “Shot Program Memory” lets you create & store 9 different shot programs of 6 shots each.

---

*Lob-ster pneumatic ball machines use air pressure to propel the ball.*

*Lob-ster Hybrid is the same as the Tournament model, except oscillation is random horizontal only. Three lower end machines also available. Please see price list.*
**PLAYMATE TENNIS BALL MACHINES**

**Dependability Since 1973**

All Playmate Machines are designed for the rigorous use of club and institutional environments. The sturdy aircraft aluminum cabinet, industrial grade motors, and high-end components ensure years of dependable trouble-free use. 3 Year Limited Parts Warranty.

All Playmate Machines feature the following standard features:

- 5 to 95 mph ball speed. • Variable topspin & backspin.
- Variable oscillation to one, two, or three lines.
- Electronic elevation control.
- On/Off remote control. • Variable ball feed. • 200 ball capacity.

BREAKAWAY GOALS

PRO-STRENGTH BREAKAWAY GOAL

This goal features the most reliable and longest lasting detent mechanism in the industry. It features a massive die cast return spring for maximum deceleration and a soft stop over its full 7” travel. The unique ball bearing positive latch is self centering which means no bolts or complicated linkage to wear out and cause the goal to get sloppy. This goal has been cycled more than 50,000 times and found to have the same rebound characteristics as a new goal. 5 Year Warranty & 10 years on detent mechanism.

SB-BA3 .................................. 26 lbs

Other SB-BA3 Versions (Not Shown)
Rear Mount
SB-BA3R ................................. 28 lbs

Our standard institutional version is the same as our SB-BA3 without the positive latch. 2 Year Warranty.

SB-BA3ND ............................... 24 lbs

Our Heavy Duty version features a second 3/8” Double Rim. 2 Year Warranty.

SB-BA3ND2 ............................. 29 lbs

SUPER HI-STRENGTH BREAKAWAY GOAL

An affordable but extremely tough ball bearing, positive latch breakaway goal. Same rebound qualities as the SB-BA3 goal. Features 2 extra heavy-duty return springs. Meets NCAA specifications. Unconditional 3 Year Warranty.

SB-BA4 .................................. 23 lbs

SB-BA4SB ............... Short Board Version

HI-STRENGTH BREAKAWAY GOAL

Designed for those who want a traditional look in a high quality Hi-Strength Collapsible Goal. This goal has been in service since 1989 and has proven very durable at the High School level. Conditional 2 Year Warranty.

BB-BA5 ................................. 20 lbs

All Breakaway goals include hardware & institutional nylon net.

Vinyl-coated foam padding attaches without any tools or hardware. Available in 5 colors - Forest Green - Navy - Black - Scarlet - Royal. Standard gray padding is non-coated.

SB-PEEL ............................... 11 lbs pr

STANDARD GLUE-ON PADDING

Gray color.

SB-SGP ............................... 11 lbs pr

42” X 72” GLASS BACKBOARD

Comes with 4” x 5” Rim Mounting. 1/2” thick tempered glass. The most common size of backboard found in higher levels of play would be the board of choice for replacing a damaged 4’x 6’ board.

- Borders and target areas are all within regulations and guidelines.
- Borders and target areas are permanently fused onto glass, eliminating scratching, staining, or fading.
- High strength clear anodized aluminum frame provides a consistent non-glare surface.
- Goal retention plate prevents the goal from falling in event of glass failure.
- 10-year warranty.

SB-BB42 ............................... Approx. shipping wt.: 190 lbs

UNIVERSAL ADAPTER PLATE

Allows for easy removal of rim for security from vanalism or liabliltiy. Orange powder-coat finish. Includes mounting hardware.

SUPER BASE WITH MAGNETIC SAFETY FEATURE

Quality molded rubber bases with ribbed design. Galvanized in-ground socket fixtures are designed to stay in place for most of the season. The magnetic safety feature causes the base to dislodge from the magnetic fixture when sufficient force is created. The break force can be varied for two junior levels and one adult level. Please see our price list for product listing.

THROW DOWN BASES

Orange rubber homeplate and three base set. Ideal for indoor and outdoor use. Made of washable and flexible rubber.
SL-TDBB ................................. 4 lbs

BASEBALL BATTING TUNNELS

All Tunnels are suitable for outdoor and indoor use. All netting is the finest high-density polyethylene (HDPE) monofilament fiber. There are two different twine sizes - 2.0 mm and 2.5 mm. All cages fabricated “on the square” to eliminate sagging - just like tennis court nets!

Custom Cages Available - Please Call

- Permanent black with UV inhibitors added during fiber extrusion.
- Netting is processed both lengthwise & depthwise for maximum knot tightness & uniform square mesh configuration (1 3/4” sq).
- Won’t absorb water like nylon cages. It sheds water!
- 5/16” HDPE border ropes with center top rope; Overlock stitching.
- 6’ rope tail at the 8 corners & 2 mid top rope ends for an easy install.

PRO MOUND

Indoor practice mound that will not damage or scratch gym floors. Features a two-piece overlapping interlock design that allows easy moving and storage. The full body polyethylene foam construction enables pitchers weight to transfer directly to floor to reduce the mound from sliding. 10” regulation height 102”L x 48”W.

SL-PMI ........ Original Model (Indoor) .......... 95 lbs
SL-PMO ........ Astroturf Model (Outdoor) .... 100 lbs
The HomePlate machine can simulate almost any pitcher that you are likely to face. It can throw a 90 MPH fastball, followed by a 75 MPH curve, followed by a change-up, followed by a slider. And it can do it all automatically with only seven seconds between pitches.

You can program your selected pitches into the HomePlate machine, then select RANDOM pitch order to simulate a pitcher for a game-like practice. The HomePlate machine can also throw stored pitches in sequential order, or you can practice repeatedly against any individual pitch.

- Patented 3 Wheel Delivery System for superior accuracy & reliability
- Innovative sound & light system designed to help batters time pitches
- Create-A-Pitch programmable control system
- Available for baseball & fastpitch softball

The programmable feature of the HomePlate machine opens up endless new possibilities for drills that target specific hitting skills. You can store up to eight different pitches in each of eight different programs.

(up to 64 total pitches)

**HEATER™ HEAVY DUTY PITCHING MACHINE**

*Pitches baseballs or softballs up to 60 mph. Will pitch real balls, pitching machine balls & wiffle balls.*

- Pop-Ups
- Line Drives
- Pitching
- Grounders

Approved by Little League Baseball

Rugged polyurethane pitching machine balls are recommended to provide the fastest and most accurate pitch possible.

JIFFY 400 LINE STRIPER

Durable hand-pump features a two-stage pump that pressureizes with fewer strokes. 4 gallon epoxy-coated steel tank & frame. Adjust line width to 5 inches.

SF-J 400 ................. 60 lbs
SEYMOUR SPRAYLINER & AEROSOL FIELD PAINT

The perfect no-hassle system for striping athletic fields. Specially designed to work with unique aerosol paint cans, guaranteed not to clog.

MARKSMART FIELD MARKING SYSTEM

The MarkSmart System Eliminates Repeated Measuring & Staking. From Now On, Just Connect The Dots!!

1 LOCATE STARTING POINT (CORNER OF FIELD)

Drive Installation Tool into ground with hammer or rubber mallet. Gently tap Installation Tool from right to left to loosen & remove from ground.

2 INSERT GROUND SOCKET (SOCKET SETTER)

Place Ground Socket in position. Set “Socket-Setter” in place as shown. Using Rubber Mallet, tap Ground Socket into hole until socket is flush with ground surface. If using heavy metal hammer, place wood block over “socket-setter” before striking.

3 MEASURE REMAINING LINE INTERSECTIONS & CRITICAL LOCATIONS

Insert ground socket at each location.

4 NOW YOU'RE READY TO STRING LINES AND...

Insert lining peg into ground sockets & attach string. With MarkSmart...you’re always on center.

5 ...JUST CONNECT THE DOTS

Follow string lines to paint field. We suggest painting end & sidelines to complete boundaries, then do interior lines.

BASIC (CORNER/MIDFIELD) SET

Most games require boundary lines (perimeter) and a midfield line. The BLP-6 is your best bet to try out the MarkSmart System. Set includes: 6 sockets w/plugs & an Installation Accessory Kit.

SF-BLP6 ...................... 5 lbs

INTRAMURAL/CLUB SPORT SET

Most Intramural & Club Sports require 14 line intersection reference points on the field. Everything you need to establish permanent reference locations for Flag Football, Lacrosse, Field Hockey, Rugby and other sports fields. Set includes: 14 sockets w/plugs and an Installation Accessory Kit.

SF-ILP14 .................... 8 lbs

SOCCER FIELD SET

Provides all the necessary tools & products to establish permanent reference points for a regulation soccer field. Set includes: 25 sockets w/plugs and an Installation Accessory Kit.

SF-SLP25 ..................... 10 lbs

Specially formulated for sharp lines on grass or pavement. Paint will not harm grass or wash away in the rain. Available in White - Orange - Yellow - Blue - Red. Sold in cases of 12 cans ....... 18 lbs

SF-SAIP  Athletic Field “T” Tip Paint for 4 Wheel Stripper. 18 oz cans
SF-SITP_ Inverted Tip Paint for Hand Wand or Hand Gun. 17 oz cans

A COMPLETE CATALOGUE ON THE MARKSMART SYSTEM IS AVAILABLE UPON REQUEST
**SITE FURNISHINGS**

REDUCED RISK JUMP PITS

Jump Pits are modular & constructed from three layers of 40 lb density open cell polyurethane foam. The top & bottom layers are solid with a honeycomb block center. Bottoms and sides are covered with extra heavy-duty 24 oz vinyl coated polyester with a "spike-proof" breather top to ensure quick air expulsion. Heavy duty zippers allow for covers to be easily replaced. Seams are reinforced and double stitched. Reinforced handles are conveniently located; two on the ends, one on the sides.

High Jump Pit 19' x 8' x 26". Made of three modules 6' 6" x 8' x 24" with a one piece top pad 2" thick.

ST-HJP26 .................. 400 lbs

High Jump Pit 19' 8" x 13' 3" x 28". Made of three modules 6' 6" x 13' 3" x 26" with a one piece top pad 2" thick.

ST-HJP28 .................. 790 lbs

HIGH JUMP CROSSBARS

- 20” x 40” Shot Mat - 60” x 60” Full Mat - Platform System

A COMPLETE CATALOGUE ON GOLF RANGE & PRACTICE EQUIPMENT IS AVAILABLE
Net Set Fixtures feature an exclusive luminaire reflector which provides the ultimate in intensity and uniformity. The “Direct Down” light design with lower pole height means you get the highest quality lighting on the court - not the surrounding area!

All fixtures have all-aluminum construction and use 1000w or 1500w Metal Halide lamps. There are five fixture designs to choose from. You can choose from square or round poles.

“NET SET” tennis lighting features the Easy Mount™ slip-fit mounting arm.

The housing of the fixture need not be opened to install. The slipfitter (A) fits over the round or square pole or tenon and secures with a welded-on interior stop and two stainless steel set bolts. The fixture has a tail-piece (B), bolted on at the factory that accepts the rectangular arm of the hanger (C). Two stainless steel set bolts are tightened on the tail-piece arm, wires are made up under the removable cap (D) and the installation is complete.

“NET SET” slotted poles offer the economy of a direct burial pole with the reinforced look of a bolt-down pole.

Reinforced hand-hole with cover.

Two underground slots 180° apart provide easy entrance and exit of conduit up to 1”PVC.

The Best Light™ fixture utilizes the total lumins produced by the light bulb and reflects them with maximum efficiency. The patented fixture disperses the light uniformly producing high quality lighting for all sports facilities.

- Reduce utility costs using fewer fixtures, producing more light.
- No external wiring for a superior looking fixture.
- Provides maximum foot candles - eliminates hot spots, dark corners and shadows.

TOMKO SPORTS SYSTEMS
SPORT COURT flooring is durable enough to withstand high-use, multi-purpose needs without compromising performance and safety. SPORT COURT’S unmatched technology exceeds the industry standard for athletic performance and injury protection. Proven performance in world class competition: NCAA, NBA special events, RHI, USA Volleyball, FIBA (the world governing body of basketball).

SUSPENDED FLOORING FOR SUPERIOR PERFORMANCE

- Multi-purpose durability
- Low maintenance costs
- Retrofits over most existing floors
- Proven 10-year limited warranty
- Quality production & timely delivery
- No adhesive required
- Quick installation
- Moisture will not damage
- No climate controls necessary

SPORT COURT offers five separate tiles designed for specific sport requirements and multi-purpose use. Many sport organizations have approved and use DIN certified Sport Court® Flooring. There are up to 16 different colors to choose from to create your own customised floor. Sport Court® flooring meets all six DIN requirements for sports floor performance.

SAFETY: Sport Court patented Lateral Forgiveness™ design allows for quick side-to-side movements with reduced stress to the knees and ankles. The suspended design provides protection against lower back and skeletal trauma. SPORT COURT® flooring has been orthopedic bio-mechanics-tested and proven to provide protection against injury.

FULL COLOR MANUFACTURERS BROCHURES ARE AVAILABLE UPON REQUEST
Plexitrac is a market leader in research & development of chemical and biomechanical properties of track materials. Augmented by scientific research conducted by major universities and institutions, Plexitrac represents the next generation of track surfacing systems.

POLYRESIN TECHNOLOGY FOR PEAK PERFORMANCE

Plexitrac is a high performance track surfacing system embodied with today’s most technological advances. Polyresin Technology was specifically developed to provide the ultimate in performance and more importantly, enhanced safety for the athlete while training. Plexitrac meets the rigorous athletic standards set by the IAAF.

Plexitrac’s unique structural matrix of select water-based resins provides durable, cohesive, non-toxic, environmentally friendly track surface with excellent ultraviolet light resistance and long term color stability. The surface shows minimal thermoplastic change from 4°C - 49°C (40°F - 120°F).

THREE SYSTEMS TO CHOOSE FROM 9.5MM - 13 MM (3/8” - 1/2”)

Plexitrac Lightning is comprised of select black SBR rubber granules bound together with black pigmented Plexitrac Binder. It is topcoated with a highly pigmented black Acrylic Plexitrac Coating.

Plexitrac Flash is the traditional black base layer SBR rubber granules bound together by red pigmented Plexitrac Binder. The system is then topcoated with the durable red Acrylic Plexitrac Surfacer which is comprised of red EPDM rubber providing intense color and a medium texture.

Plexitrac Accelerator offers the highest levels of performance for texture, longevity and athletic capability. Accelerator is a highly textured, EPDM surface which provides optimum traction and color intensity. Topcoated with the Acrylic Plexitrac Coating that ensures uniformity and years of ultraviolet light stable color.

Plexitrac System products are available for new installation as well as for retexturing, rejuvenating and enhancing existing asphalt, SBR latex, urethane and Reslite type running tracks.
